LAKSHAY RAWAT

lkomrawat@gmail.com | +91 8178435190 | New Delhi, India | LinkedIn | GitHub | Leetcode | GitLab

EDUCATION

SBDAV PUBLIC SCHOOL, VASANT VIHAR, NEW DELHI Apr 2018 – Apr 2022

Class XII | 90%

NETAJI SUBHAS UNIVERSITY OF TECHNOLOGY, NEW DELHI Aug 2023 – May 2027

B.Tech | CGPA: 7.81 / 10.0

WORK EXPERIENCE

SWYTCHCODE *San Francisco, California, USA* / Remote

Software Developer Intern Mar 2026 – Present

- Engineered a Go-based CLI tool distributed via npm across macOS, Linux, and Windows, acting as a policy-controlled execution middleware between AI agents and real APIs.
- Integrated WorkOS/OAuth authentication and policy enforcement into the Go CLI, plus custom MCP servers (Gmail, GitHub) to demonstrate real-world agentic workflows end to end.
- Designed and shipped agentic SDKs in Python and TypeScript, standardizing packaging under @swytchcode (npm + PyPI) and automating publishing from GitHub via OIDC Trusted Publisher.
- Tech Stack: Go, Cobra, TypeScript, Python, MCP (SSE + Streamable HTTP), WorkOS/OAuth, npm/PyPI, Node.js.

PROJECTS

Satellite Land Use Classifier | Link

- Classifies satellite imagery into 10 land-use categories for geospatial monitoring applications, trained on 27,000 EuroSAT images achieving 95.7% test accuracy.
- Chose EfficientNet-B0 over ResNet50 for its compound scaling efficiency same accuracy at 4x fewer parameters, critical for CPU inference in deployment.
- Implemented Grad-CAM by hooking into final conv layer gradients to generate pixel-level heatmaps for model interpretability.

STRIPE PAYMENT GATEWAY | Link

- Built a production-style payment backend using Fastify and TypeScript that handles the full payment lifecycle product listing, cart management, Payment Intent creation, and webhook-driven status updates with server-side amount calculation to prevent client-side price tampering.
- Enforced data consistency under failure using MySQL transactions payment status updates and cart clearing execute atomically, so a partial failure never leaves the database in an inconsistent state.
- Solved duplicate charge prevention by generating idempotency keys per cart, ensuring retried network requests reuse the same Stripe Payment Intent instead of creating duplicate charges.

TECHNICAL SKILLS

Languages: C++, Go, JavaScript, TypeScript, SQL, Python

Frameworks & Libraries: React.js, Next.js, Node.js, Fastify, Cobra, Axios, PyTorch, Gradio

Databases: MySQL, MongoDB, Redis

Tools & Platforms: Git, GitHub, Docker, Firebase, Postman, GitLab, Google Colab, HuggingFace

Core Competencies: Data Structures & Algorithms, OOPs, REST APIs, System Design basics, CI/CD, OS, DBMS, CN, ML (basics)

CO-CURRICULAR ACTIVITIES

Placement Coordinator, Head of Data Department, NSUT Jan 2026 – Jul 2026

- Led placement analytics & NIRF reporting, building audit-ready data systems for outcomes, salary trends, and hiring patterns.
- Managed 15+ coordinators, enabling 1,000+ offers via targeted outreach and parallel drive execution.
- Managed end-to-end coordination of interviews, handling scheduling and communication between recruiters and students.

ACHIEVEMENTS & CERTIFICATIONS

- Earned Full Stack certification from 100xDevs. Certificate
- DSA: 500+ problems solved on all platforms.
- Secured Elite + Gold medal in Introduction to Internet of Things. Certificate
- Earned a Model Context Protocol Certification from Anthropic. Certificate
